

MKS Implementer 2008 Administrator Training

A successful configuration management system is not built on software alone. At MKS, our professional services team is committed to understanding our clients' ever changing development environments and providing training, upgrade, implementation and installation services to meet their unique technical requirements.

We guide you through process analysis, software installation, implementation and product and process training for MKS Source, MKS Integrity and Implementer for IBM i5 product lines. This ensures maximum control over your software development activities and provides a compelling return on your MKS technology investment.

Below is an outline of MKS Implementer Administrator training:

Duration: 2 days

Pre-requisite(s): None

Maximum number of students per class: 5

Intended audience:

This course is for sites that will use MKS Implementer. It covers Implementer administration concepts, operations and processes. It is meant for users who will need to perform or know how to perform these tasks:

- Configuring the source change management infrastructure
- Setting up security and permissions
- Customizing the promotion process

The following material is covered in the course:

- Process – Terms and life cycle configuration.
- Object Codes – Develop repository and define compile options.
- Environments – Define promotion stages and rules.
- Archiving – Capturing and restoring previous versions of code.
- Users – Defining users and their capabilities.
- Remote Deployment – Configuring communications for remote receivers.
- MKS Integrity – Configure deployment process control integration.
- MKS Source – Configure continuous migration of source to MKS Source project.
- RDI/WDSC– Install and configure plug-in for RDI/WDSC
