

## **MKS Source Basic User Training**

A successful configuration management system is not built on software alone. At MKS, our professional services team is committed to understanding our clients' ever changing development environments and providing training, upgrade, implementation and installation services to meet their unique technical requirements.

We guide you through process analysis, software installation, implementation and product and process training for MKS Source, MKS Integrity and Implementer for iSeries/AS400 product lines. This ensures maximum control over your software development activities and provides a compelling return on your MKS technology investment.

Below is an outline of MKS Source Basic User training:

Duration: 1 day

Pre-requisite(s): None

Maximum number of students per class: 15

### **Intended audience:**

This course is for sites that will use MKS Source. It covers basic Source concepts, operations and processes. It is meant for anyone who will need to perform or know how to perform these tasks:
