

## **MKS Configuration Management Basic User Training**

A successful configuration management system is not built on software alone. At MKS, our professional services team is committed to understanding our clients' ever changing development environments and providing training, upgrade, implementation and installation services to meet their unique technical requirements.

We guide you through process analysis, software installation, implementation and product and process training for MKS Configuration Management, MKS Workflows and Documents and Implementer for iSeries/AS400 product lines. This ensures maximum control over your software development activities and provides a compelling return on your MKS technology investment.
