

SERVICE INVENTORY SOLUTIONS PROGRAM DESIGNED TO MAXIMIZE TOOL UPTIME

SERVICE INVENTORY SOLUTIONS PROGRAM DESIGNED TO MAXIMIZE UPTIME

Maximizing tool uptime is critical. MKS can tailor a service inventory program to provide the products you need, when and where you need them, minimizing tool downtime from an unexpected failure.

PROGRAM DESIGN

MKS' Service Inventory Solutions Program is designed to provide supply chain resiliency by identifying high use parts critical to your production process and stocking them to ensure fast delivery when a tool suddenly goes down and a replacement is needed.

The program includes Flow, Power, Plasma, Pressure Measurement, Residual Gas Analyzer (RGA), and Valve product lines. Customization of a

Reduce inventory carrying costs

Simplify order processing

Streamline delivery and logistics with single source supplier

spare parts delivery program can help reduce your inventory carrying costs, simplify ordering and delivery logistics with a single source of supply, and provide consistent tool performance by using replacement parts from the original manufacturer.

DEDICATED INVENTORY

Inventory is identified and dedicated for each customer participating in the program. Based on the agreement and your needs, stock can be held at an MKS facility, in a 3rd party consignment warehouse, or in your manufacturing facility as vendor managed inventory (VMI). We partner with you to understand your overall supply chain needs and identify the best path for spare parts inventory management to ensure you get the parts you need fast.

DELIVERY

MKS' Service Inventory Solutions Program helps streamline ordering and delivery of spare parts from the original manufacturer, simplifying logistics and associated costs. With an already vetted supply chain source ensuring you get the quality product you need, agreed upon parts in stock, and a fixed price per individual product, a purchase order can be quickly generated. The program supports expedited order processing and rapid product delivery, quickly getting you the parts you need to get the tool up and running.

WHY MKS?

CRITICAL TECHNOLOGIES

World-class technology and development capabilities for leading-edge processes

PROVEN PARTNER

Recognized leader delivering innovative, reliable solutions for our customers' most complex problems

OPERATIONAL EXCELLENCE

Consistent execution across all aspects of our business

COMPREHENSIVE PORTFOLIO

Extensive offering of products and services for the markets we serve

MKS INSTRUMENTS enables technologies that transform our world. We deliver foundational technology solutions to leading edge semiconductor manufacturing, electronics and packaging, and specialty industrial applications.

We apply our broad science and engineering capabilities to create instruments, subsystems, systems, process control solutions and specialty chemicals technology that improve process performance, optimize productivity and enable unique innovations for many of the world's leading technology and industrial companies.

Our solutions are critical to addressing the challenges of miniaturization and complexity in advanced device manufacturing by enabling increased power, speed, feature enhancement, and optimized connectivity. Our solutions are also critical to addressing ever-increasing performance requirements across a wide array of specialty industrial applications.
